Bio:

Alajab Mohammed Alajab is a professor specializing in instructional technology and distance learning at Arabian Gulf University. He holds a B.Sc., M.Ed. and PhD in Educationall Technology from Khartoum University, and a Ph.D. in Computer Science from Rise University, USA. His career began as a teaching assistant in physics and instructional technology at Khartoum University, where he taught various subjects including physics, mathematics, instructional technology and computer science.

In 2005, he joined Arabian Gulf University as an assistant professor and later became an associate professor in 2012. He has played a significant role in developing distance education programs, including leading the King Hamad e-Learning Chair initiative. He has published numerous articles and supervised over 150 theses in educational technology and related fields. In 2018, he was instrumental in securing accreditation for the university's distance learning programs. From 2016 to 2020, he served as the coordinator of the distance teaching program and director of the King Facial Examination Center. In March 2021, he was promoted to full professor.
