

بعض الانطباعات من المشاركين في الدفعة التاسعة

Ahmed AlQattan, Bahrain (9th batch)

"Everything was great, the quality of the learning experiences and the environment makes you feel like you are with your family. Thanks to all Doctors who supported us, and to the coordinator team for their patience."

Ahmed AlShamsi, UAE

"Overall, the experiences we had in this IWRM course at AGU made a significant difference, because we met with students from all Arab countries. It is a unique experience especially because it is in Bahrain. The knowledge that was delivered to us in this course will be recommended to others to be taken and even any other courses offered by AGU."

Ahmed Fouda, Egypt

"The teaching staff are highly qualified with skills of simplifying and transmitting information. The general atmosphere of the study within the university, including the calmness and cleanliness of the place, in addition to the use of modern devices in the educational process, helps in innovation and creativity, that support delivering information more easily and smoothly."

Anwar AlSheraimi, KSA

"جامعة الخليج العربي حقاً رائدة في مجال أنسنة التعليم وتهدف الجامعة إلى توفير تجربة تعليمية مميزة للطلاب، حيث يشعرون بأنهم هم المقصد الأساسي لخدمة التعليم. وتوفر الجامعة مرافق متطورة ومريحة للطلاب، مما يساهم في راحتهم وتحفيزهم للتعلم. أكثر ما أعجبني في دراستي كان اهتمام الأساتذة بفهم الطلاب وتوسيع مداركهم وتعزيز التواصل الإيجابي. كما أن البساطة والسهولة في التعامل مع الهيئة التدريسية والموظفين جعلت تجربة التعلم ممتعة. بشكل عام، التركيز على التعليم المركز على الطالب والبيئة الداعمة والمتعاونة خلقت جوّاً مناسباً للتعلم والنمو الشخصي."

Bader AlShehri, KSA

"راضي جداً عن كفاءة التعليم في الجامعة. وأكثر ما يميزها الخبرات والكفاءات عند الأساتذة. ما شاء الله كل شيء كان تمام ولا يوجد ما اقترحه."

Magdi Ahmad, Yemen

"ما يميز هذا البرنامج هو كمية المعلومات القيمة والجديدة، بالإضافة إلى طرق التواصل وإتاحة الفرصة. بالنسبة لي كان كل شيء منظم ومرتب ونشكر الجامعة على كل شيء."

Osama Tabash, Palestine

"The Arabian Gulf University is well-regarded institution that prioritizes health, human development, science and technology. As such the IWRM program is designed as an innovative teaching way in the Arab Region, bridging research and practice through interactive and advanced materials in the water sector with partnership with UNU-INWEH. What distinguishes this program is: Academic Professionalism of AGU staff, available electronic resources (as library) and public events (as science days, national days, sporting events, conferences), cooperation with students, especially Prof. Waleed, Ms. Fadia, and all academic staff. In addition, collaborating with my colleagues is also a fulfilling experience. Their diverse perspectives and expertise had challenged my own thinking and helped me to see problems in new ways. We have been able to leverage each other's experience strengths, leading to more comprehensive understanding of the topics and working better on the water sector. Moreover, the use of technological tools in teaching and the ability to access to recorded materials at any time improved our interaction with academic staff."

Rabeea Badaam, Yemen

"Honestly, the most thing I liked is the Kindness of the Academic staff (Doctors/Professors), general staff and hostel staff. All of them were dealing with us as brothers and tried to help all of us during the period of the program. Also, all the services inside the university are of high quality, starting from the university hostel, the transportation, classrooms, and the library. I would like to express my gratitude and appreciation to all who made this program very successful, especially Dr. Waleed Zubari."

Raed AlHarbi, KSA

"راضي وبشدة عن كفاءة التعليم وأتمنى العودة لها متى ما أتاحت الفرصة لإكمال الماجستير. يكمن العمل في جامعة الخليج على العمل التشاركي والتفاعلي مع الجميع مع وجود كامل الممكّنات المتاحة لذلك."

Raed Ghazal, Jordan

"I am satisfied with the overall quality of my learning experiences at Arabian Gulf University. I particularly appreciate the supportive learning environment at the University, which fostered collaboration, critical thinking, and the feeling of belonging among students and faculty. The emphasis on practical application of concepts through case studies and real-world examples enriched my learning experience and prepared me well for addressing water resource management challenges. What I mostly dislike is that the study time at Arabian Gulf University eventually came to an end."

Saleh Elsenuusi, Libya

"كانت تجربة رائعة، وبيئة تعليمية متميزة من أساتذة وطرق التدريس وأيضاً طلبة الجامعة في السكن الجامعي. كانت تجربة ممتازة من كل النواحي التعليمية والإجتماعية."

Sanaa AlAlewi, Syria

"It is a great opportunity to study at the Arabian Gulf University, and to be with experts and share their experiences, and to give students hands-on experience. The study improved better understanding of the challenges in water resource management, enhanced the professional development of students, by keeping us updated with the latest research and trends in water management, promoting research initiatives within the program and encouraging us to contribute to advancements in IWRM through meaningful research projects."

Zakareya Bucheery, Bahrain

"The course's topics cover excellent information related to water resources and management. In addition, the communication with the students from various Arab countries and learning about their experiences in water management in their regions is very beneficial."

بعض الانطباعات من المشاركين في الدفعة الثامنة

Esra El-Hasan, Republic of Sudan

"From an organizational point of view, I liked that the program is very organized and the schedule went the way it was set from day one. As for the educational material, it was very useful and rich in many new and useful sciences. As for the trainers, I benefited from them to the fullest, in addition to my colleagues as well. The experience was unique and useful."

Yasir Al-Saeedi, Sultanate of Oman

"Honestly, I liked everything about AGU, the professors, the supervisors dealing with students, the supervisors' classy style."

Sharifa Al-Shehi, Sultanate of Oman

"The diploma program contains all the methods that can be used to address water-related problems. The topics offered for study are not found in other universities, whether Gulf or international."

Aisha Al-Yamahi, United Arab Emirates

"اشعر بالامتنان والفخر للفرصة التي أتيت لي للمشاركة في الدبلوم الذي تنظمه جامعة الخليج العربي والتعرف على الكادر التعليمي والمهني الذي على مستويات عالية من الخبرة وسعة الاطلاع. أيضاً أعجبنى التشجيع على الكتابة العلمية للبحوث الأكاديمية."

Fadhel Ebrahim, Kingdom of Bahrain

"Respect and understanding of student's needs. The course leader commitment for the program successes. The course presentations were recorded for students who couldn't attend on time and for future reference. Different skills were taught along with the course materials (i.e. presentation skills, scientific report writing, critical thinking and mapping, research methodologies)."

Hani Al-Khalifa, Kingdom of Saudi Arabia

"I found it very rewarding experience. I learned many important principles of water management and essential resources from the university and UN reports."

Sami Marhoon, Kingdom of Bahrain

"What we liked during our study was the passion of the instructors for teaching their subjects."

Ali Al-Shaikh, Kingdom of Bahrain

"Getting to know students from different backgrounds, countries, and fields which allowed for knowledge exchange and expertise transfer. Being educated under specialized and experienced teaching faculty."

Batool Al-A'ali, Kingdom of Bahrain

"The flexibility and the way how the courses were organized."

Yasmin Malla, Syria

"The experiences that were provided to me by the professors, the good handling and the high and continuous coordination by the supervisory staff."

Sarah Al-Dawood, Iraq

"The method of the lecturers in transferring information and their keenness to follow up on the student and correct the mistakes that he makes, whether it is in the study questions or exams or by the supervisors of the research."

Hamed Al-Mazidi, Kuwait

"Professional staff with deep technical/academic backgrounds and their availability and easy to reach with immediate response time. Different cultures and experiences were presented during the lectures and through Q&A discussions, and new information was added to my knowledge."
